

FRANKFURT

Sustainable Finance Cluster

<https://sustainablefinancecluster.com/en/>

Background

The Sustainable Finance Cluster was created in 2018 from a merger of the Accelerating Sustainable Finance Initiative of Deutsche Börse and the Green Finance Cluster Frankfurt of the Hessian Ministry of Economics.

Objectives

Sustainable Finance Cluster's main aim is to formulate and implement concrete approaches for the sustainability of national and international financial markets. It aims to work closely with all stakeholders in order to pool existing expertise in the field of sustainable finance and develop it further together. In this way, they create clear added value for their members and sponsors.
